

My views are as follows:

- 1- Rather than increasing the number of electoral divisions, I suggest that the total number be reduced to 70.
- 2- This number would drastically reduce the cost of the provincial bureaucracy and give the MLA's just a little more to do for their overpaid salaries.
- 3- It is my understanding that this province already has the highest cost per capita and under the proposed increase it would only be worse.
- 4- Wasted dollars are being spent by this administration and could be much better used for education and health care for the seniors.
