

Comments regarding election boundary:

1.0 Fundamental issue is one person one vote which is ethics of democratic government. When I am looking at population it varies from less than 30,000 to 60,000 person per MLA. Unbelievable???. There has to be approx. equal number of voters per MLA to represent balance and true democracy.

2.0 Total number of MLA are acceptable to keep same. Therefore take total population divide by number of seat and draw boundary to reflect democracy. Now in edge of high communication with TV, Internet and cell phone argument of too far or too big is dubious to propel other view.

3.0 We need effective MLA dedicated to population not political party. How can you change that???

Regards

Indra Patel
