

Deja vu??????

I cannot believe that this government is repeating the past....Another commission and more mailouts to recycle!!!! How much is that costing us????

I don't think it's appropriate right now to spend this type of money on increasing the numbers of MLAs in this province. YOu would think that this gov would spend the money in more meaningful places like preserving our health care status at ground level and our future by supporting children in education (in the classroom). Too much money is spent on provincial testing those children. They don't need to be tested as much as they need classroom support and less stress on teachers with large groups.

I think there are too many over paid and bonus receiving governement workers in Edmonton...It's a very "top heavy" governement right now...in Education and Health Care.

Where has all the money gone in the last few years of BOOM?????? Shouldn't our government have saved for "the rainy days"? I don't get it.

Stella , a concerned citizen.
