

Further to your flier in the mail, I would like to suggest the following:-

1. Instead of adding more seats to the Legislative Assembly of Alberta, as each seat costs the Alberta taxpayers a million dollars a year Maybe 40 seats should be cut., thereby saving \$40,000,000 a year.
2. Cut the salaries and expense claims of the remaining members by 50%.
3. Cut out the golden handshakes and the so called "bonuses" at the end of their term.
4. Cut out these government commissions, as these are usually plum jobs given to political appointees. And, after a few years of discussion, of the findings, the government will not implement most of them, or will amend them to suit their way of thought. Most are a pure waste of time and the taxpayers money.

Respectfully submitted,

William R. Bale
