

I believe that everybody should be treated in an equal and just manner. If the system is not just, then it should be changed and the laws governing the boundaries changed. Therefore, I recommend for every vote to be equal and all constituencies should have a population of plus or minus ten per cent.

The federal system responded to special interest groups. As a result one person's vote in one constituency has a weight of five as compared to another constituency where it counts as one (i.e. in PEI).

In Alberta one vote should be equal to another vote. We do not need 1st, 2nd and 3rd class citizens and once these classifications are created you will never get rid of them.
