

After reading a letter to the Calgary Sun Editor, I had to write this e-mail. Why on earth would you want to increase the number of MLA'S in this province? When the debt load became so high in this province it is time to look in your own backyard. We all know that other than the top Ministers, most MLA's are back benchers. How would increasing their numbers help us? Our Civil Service is far too large already and we understand that it is the largest per capita in the Country.

Perhaps you should be looking at **cutting staff in your departments** and becoming more **fiscally** responsible. As average middle class Albertans, if my husband and I ran our finances the way you people run our government we would have been on welfare years ago.

Electing more MLA's will not solve our problems. Enough!!!!
